PERSONAL PROFILE

I am a self-taught, self-sufficient, motivated Web Developer. I strive to deliver the best quality-, efficient- and modern code possible.

Attention to detail is my greatest professional concern, without it my work would just be average. I take great care in writing clean and readable, high quality code as the presentation of my work is the legacy which I leave.

My favourite part of the work is dealing with the UX, although every other part is just as important. I prioritise visual perfection and user friendliness – with a simple test to judge if it is good enough: Would I like working with it as an end user?

I feel at ease working in either a team environment or alone. Being a self-taught developer also means that I am at the stage in my career where I feel it necessary to "pay it forward" and help mentor junior developers.

I have more than ten years of experience in the software development industry and although I have no formal tertiary education, I believe that my practical experience has been an education of its own. This should stand me in good stead to complete any project successfully.

EXPERIENCE

Lead Developer

forgood.co.za | 2017 - Current (Consulting)

- Run small, Agile, Dev Team
- Architect new features
- Implement new features
- Mentor intermediate developer
